Ingénieurs Hospitaliers de France is greatly honoured to have been chosen to organise the **10th European Conference on Healthcare Engineering**. The association hopes to offer the best possible welcome to our European colleagues and arrange an outstanding event that promises to mark a new milestone in the development of European healthcare engineering.

10th ECHE will take place in Paris in conjunction with the 63rd IHF Study and Training Days (IHF STD) at the CNIT FOREST Conference Centre in the Paris La Défense business district from 14 to 16 June 2023.

Major challenges currently facing healthcare engineering: sustainable development and reducing carbon emissions, life cycles and overall cost, the development of digital and artificial intelligence, involving users in the design of healthcare spaces and more traditional themes of managing maintenance and operation and the design of the healthcare built environment will be discussed by **leading speakers from IFHE EU member countries** during two plenary sessions and eight themed workshops.

A trade fair including suppliers, industry figures, designers, consultants, etc. and specific forums will allow visitors to discover innovations and enjoy discussion and debate with other professionals.

Finally, there will be **multiple spaces and opportunities for friendly interaction** during this event, as a key objective of this European conference is for figures from the European healthcare engineering sector **to share and discuss topics, as well as network with their European colleagues.**

We look forward to meeting you in Paris.

Bruno CAZABAT,
president IHF

Jacques ROOS,
vice-president IHF, *vice-president IFHE EU*
